OXFORD INDUSTRIES, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS QUARTERS ENDED NOVEMBER 29, 1996 AND DECEMBER 1, 1995

- The foregoing unaudited consolidated financial statements reflect all adjustments which are, in the opinion of management, necessary to a fair statement of the results for the interim periods. All such adjustments are of a normal recurring nature. The results for interim periods are not necessarily indicative of results to be expected for the year.
- The financial information presented herein should be read in conjunction with the consolidated financial statements included in the Registrant's Annual Report on Form 10-K for the fiscal year ended May 31, 1996.
- The Company is involved in certain legal matters primarily arising in the normal course of business. In the opinion of management, the Company's liability under any of these matters would not materially affect its financial condition or results of operations.

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

NET SALES

Net sales for the second quarter of the 1997 fiscal year, which ended November 29, 1996, increased 8.6% from net sales for the same period of the prior year. Net sales for the first six months of the current year decreased by 0.2% from net sales for the same period of the prior year.

Second quarter net sales increases in the Company's Men's Slacks Group, Tailored Clothing Group and Womenswear Group were slightly offset by decreases in the Men's Shirt Group and last year's divestiture (B.J. Designs) and closure (RENNY(r)). Within the Company's Men's Shirt Group, increased sales for Tommy Hilfiger(r) Golf, Tommy Hilfiger Dress shirts and Polo(r) for Boys were offset by declines in the private label lines while Ely & Walker net sales were flat with

last year. The decline in the Men's Shirt Group private label net sales is attributable to the Company's exit from the wet process "wrinkle-free" product.

The Company experienced an overall net sales unit volume increase of 7.6% while experiencing an overall 1.0% increase in the averages sales price per unit during the second quarter of the current year. Second quarter net sales included greater increased sales in the Company's licensed designer divisions (with higher average sales per unit) than in the private label divisions. For the first six months of the current year the Company experienced a 5.6% decrease in overall net sales unit volume while managing a 5.7% increase in the average sales price per unit.

COST OF GOODS SOLD

Cost of goods sold as a percentage of net sales, was 81.8% in the second quarter of the current year as compared to 83.0% in the second quarter of the prior year. For the first half of the current fiscal year, cost of goods sold as a percentage of net sales was 81.8% and 83.0% for the first half of the prior fiscal year. The decrease in cost of goods sold as a percentage of net sales was due in part to the increased sales of higher margin lines. Another factor contributing to the decreased percentage was the continuation of the shift from domestic production to offshore production yielding relative decreased costs per unit.

SELLING, GENERAL AND ADMINISTRATIVE EXPENSES

Selling, general and administrative expenses decreased by 2.8% to \$24,890,000 in the second quarter of fiscal 1997 from \$25,596,000 in the same period of fiscal 1996. Selling, general and administrative expenses decreased by 2.6% to \$49,576,000 for the first six months of the current year from \$50,914,000 for the first six months of the prior year. As a percentage of net sales, selling general and administrative expenses decreased to 12.2% for the second quarter of the current year from 13.7% for the second quarter of the prior year, and decreased to 13.2% for the first half of the current year from 13.5% for the first half of the prior year. The decrease in selling, general and administrative expenses are predominantly the result of last year's divisional divestiture (B.J. Designs) and closure (RENNY).

INTEREST EXPENSE

Net interest expense declined by \$805,000 to \$1,071,000 or 0.5% of net sales in the second quarter of the current year from \$1,876,000 or 1.0% of net sales in the second quarter of the prior year. Net interest expense declined by \$1,550,000 to \$2,167,000 or 0.6% of net sales in the first half of the current year from \$3,717,000 or 1.0% of net sales in the first half of the prior year. The reduction in interest expense was due primarily to the reduced inventory from the prior year.

INCOME TAXES

The Company's effective tax rate was 40.0% in the second quarter of both the current and previous year and for the first half of both the current and previous year and does not differ significantly from the Company's statutory rate.

FUTURE OPERATING RESULTS

At the current writing, the Christmas retail results appear to have been mixed with most retailers expecting only modest single-digit percentage sales gains. The Company expects the continuation of highly competitive market conditions at wholesale and at retail. The Company expects to produce a solid single-digit sales gain in the second half. If the Company's sales expectations are achieved, the Company expects a solidly profitable second half.

LIQUIDITY AND CAPITAL RESOURCES

OPERATING ACTIVITIES

Operating activities generated \$6,978,000 during the first six months of the current year and \$20,529,000 in the first six months of the prior year. The primary factors contributing to this reduced generation of funds was a smaller decrease in trade payables offset by increased receivables and a smaller decrease in inventory than from the prior year.

INVESTING ACTIVITIES

Investing activities used \$982,000 in the first half of the current year and \$11,750,000 in the first half of the prior year. The primary factor contributing to this change was the acquisition of Ely & Walker in the first quarter of the prior year.

FINANCING ACTIVITIES

Financing activities used \$3,301,000 in the first half of the current year and \$6,750,000 in the first half of the prior year. The primary factors contributing to this change were the change in short-term borrowings and long-term debt.

The Company purchased and retired 100,000 shares of its common stock during the six months ended November 29, 1996. During the period after the end of the second quarter through January 6, 1997, no shares have been purchased and retired. Due to the exercise of employee stock options a net of 12,240 shares of the Company's common stock were issued during the first six months and 15,000 shares were issued since November 29, 1996 through January 6, 1997.

On January 6, 1997, the Company's Board of Directors declared a cash dividend of \$.20 per share payable March 1, 1997 to shareholders of record on February 14, 1997.

WORKING CAPITAL

Working capital decreased from \$143,107,000 at the end of the second quarter of the prior year to \$137,337,000 at the end of the 1996 fiscal year and increased to \$144,639,000 at the end of the second quarter of the current fiscal year. The ratio of current assets to current liabilities was 2.4 at the end of the second quarter of the prior year, 2.4 at the end of the prior fiscal year, and 2.4 at the end of the second quarter of the current year.

FUTURE LIQUIDITY AND CAPITAL RESOURCES

The Company believes it has the ability to generate cash and/or has available borrowing capacity to meet its foreseeable needs. The sources of funds primarily include funds provided by operations and both short and long-term borrowings. The uses of funds primarily include working capital requirements, capital expenditures, acquisitions, dividends and repayment of long-term debt. The Company regularly utilizes committed bank lines of credit and other uncommitted bank resources to meet working capital requirements. On November 29, 1996, the Company had available for its use lines of credit with several lenders aggregating \$52,000,000. The Company has agreed to pay commitment fees for these available lines of credit. At November 29, 1996, \$50,000,000 was in use under these lines. Of the \$50,000,000, \$40,000,000 is long-term. In addition, the Company has \$186,000,000 in uncommitted lines of credit, of which \$98,000,000 is reserved exclusively for letters of credit. The Company pays no commitment fees for these available lines of credit. At November 29, 1996, \$18,000,000 was in use under these lines of credit. Maximum borrowings from all these sources during the first six months of the current year were \$96,000,000 of which \$56,000,000 was short-term. The Company anticipates continued use and availability of both committed and uncommitted resources as working capital needs may require.

The Company considers possible acquisitions of apparel-related businesses that are compatible with its long-term strategies. There are no present plans to sell securities or enter into off-balance sheet financing arrangements.

ADDITIONAL INFORMATION

For additional information concerning the Company's operations, cash flows, liquidity and capital resources, this analysis should be read in conjunction with the Consolidated Financial Statements and the Notes to Consolidated Financial Statements contained in the Company's Annual Report for fiscal 1996.
